

## OKLAHOMA HEALTH RESEARCH

### What is Oklahoma Health Research?

The Oklahoma Health Research program funds basic research projects related to human health for one to three years at a maximum level of \$45,000 per year. The awards enable researchers to gain the expertise and produce the data needed to obtain larger grants from federal agencies and other national funding organizations. All proposals are reviewed and ranked for funding by experienced health researchers who reside outside the state of Oklahoma. Peer reviewers evaluate applications for scientific merit based on the quality of the proposed research, qualifications of the principal investigator and appropriateness of the institutional facilities and budget.

### Why Oklahoma Health Research?

- Awards up to \$135,000
- Length of funding 1-3 years
- No match required
- Basic research projects

### Eligibility

- Oklahoma public or private colleges or universities
- Non-profit research foundations
- Private enterprises with the principal place of business in Oklahoma
